

MMAUG / AI & DEVOPS BOOTCAMP

Responsible AI for AI Users

A practical review before sharing or acting

Meet the speaker

Software workflows across candidates, recruiters, vendors and employers

**Sai Pavan Kumar
Gopularam**

Founder
Giraffy Reach and C2C Central

I build a connected C2C hiring and staffing ecosystem.

- My work connects information across organizations.
- A draft can look right while losing important context.
- Today we will practice checking evidence before acting.

CONNECT

Today's session

60-minute core session, with additional time for questions

01 Context

A useful answer can still contain errors

02 Concepts

Evidence, privacy and human responsibility

03 Demo

A claim checked against a source

04 Practice

20-minute review of fictional examples

05 Next steps

A checklist to use on your next task

What participants will learn

A review record you can explain to another person

01

01

Trace

Connect a claim to an approved source.

02

02

Protect

Remove private data the task does not need.

03

03

Recognize

Spot instructions hidden inside source text.

04

04

Decide

Record what a person must check before release.

No coding, subscription or cloud resources required

DISCUSSION

A polished answer can still be wrong

What would you check before sending an AI-written announcement?

Responsible use in an everyday task

A person remains accountable for the decision to share or act

Review the evidence and the effect of the action

For an event announcement, verify the date, price and registration rules before publishing. Pause when information is missing.

EXAMPLE

“A recording is guaranteed” needs evidence from the organizer.

Supported, contradicted or unknown

A missing answer is a reason to ask, rather than guess

CONTRADICTED

- Draft: October 16
- Source F2: October 15
- The source states a different date.
- Correction: October 15, 2026

UNKNOWN

- Draft: recording guaranteed
- Source F7: not confirmed
- The source does not settle it.
- Action: ask the organizer

DECISION Supported claims have direct evidence. Preserve them when revising.

Review before release

The assistant produces a draft. An authorized person decides what happens next.

A draft never grants itself permission to publish, charge money or change records.

Questions before using an AI answer

A workshop checklist for people using AI tools

01

01

PURPOSE

What exactly did we ask the tool to do?

02

02

EVIDENCE

Which source supports each claim?

03

03

PRIVATE DATA

Does this task need those details?

04

04

SOURCE TEXT

Does it contain hidden instructions?

05

05

ASSUMPTIONS

Did the answer stereotype anyone?

06

06

AUTHORITY

Who can approve the final action?

A claim-by-claim review

Fictional example from SOURCE-PACK.md and SAMPLE-OUTPUTS.md

DEMO GOAL

Find one wrong claim and one unresolved claim.

- 1 Open the approved facts
- 2 Split the draft into claims
- 3 Label each claim with evidence
- 4 Correct it and check again

DRAFT: October 16

F2: October 15

Contradicted

Correction: October 15

Use the supplied outputs if a live AI tool is unavailable.

Hands-on exercise

Open LAB.md in the public repository

TIMEBOX

20

MINUTES

WORK MODE

Individual or pairs

PREREQUISITE

Browser and notes

YOUR TASK

Review and repair the fictional announcement.

- Read F1–F9 and label the claims.
- Rewrite the announcement using evidence.
- Review data, instructions and assumptions.
- Record the human decision and missing link.

SUCCESS CHECK

No unsupported claims. Clear evidence and a named approval role.

A corrected announcement

Compare your answer with *ANSWER-KEY.md*

CASE A: KEY FACTS

Community AI Basics
October 15, 2026, 14:00–15:00 UTC
Online, free, registration required
Capacity: 30 people
Live captions available
Recording: not confirmed

1

Keep supported details, including the exact UTC time.

2

Remove the participant data and reject the hidden instruction.

3

Ask for the approved registration link before publication.

Decisions from the lab

The checks matter most when someone will act on the answer

01

01

Source text

Case C: ignore the instruction to change the price and request a password.

02

02

Evidence

Case A: preserve the correct facts and ask about unknown details.

03

03

Private data

Case B: a generic reminder needs event facts, not personal records.

04

04

Fair treatment

Case D: remove the age stereotype. Use the actual prerequisites.

The organizer approves release. The checklist supports judgment and does not guarantee safety.
